

House rules:

1. talking with respect to each other
2. get friends along the way, have fun, but take the task seriously
3. asking for advice is necessary to create the best version of the project
4. freedom of choosing what you work on, as everybody has different solutions and interests
5. deadlines should be met but also include an overhead, Trello is the tool we will be using
6. if you find a mistake of an improvement to a feature somebody made you should help the person
7. find original features to distinguish our project from others
8. if encountering problems with adding a feature and another colleagues know how to do it, they should work as a team, so that both parties get experience
9. have a plan when starting adding a feature, first have a layout on paper or any other means of visualizing

Communication ruleset:

1. discord and whatsapp are the main way of communicating, discord is for messages for all of us, and whatsapp for more direct communication;
2. use doodle for democratically discussing a date of a meeting, we should have 2 to 3 meeting a week

Naming conventions:

1. java naming convention for the code
2. name your commit, added feature, bugfixes
3. a main development branch, when the devbranch is bug free and works correctly, vote on committing to master, master should always be working
4. branch naming, first the type of commit dash then camel casing (ex. bugfix-chatboxNullPointerException)
